

INNOVATING EXCELLENCE FOR OVER 150 YEARS

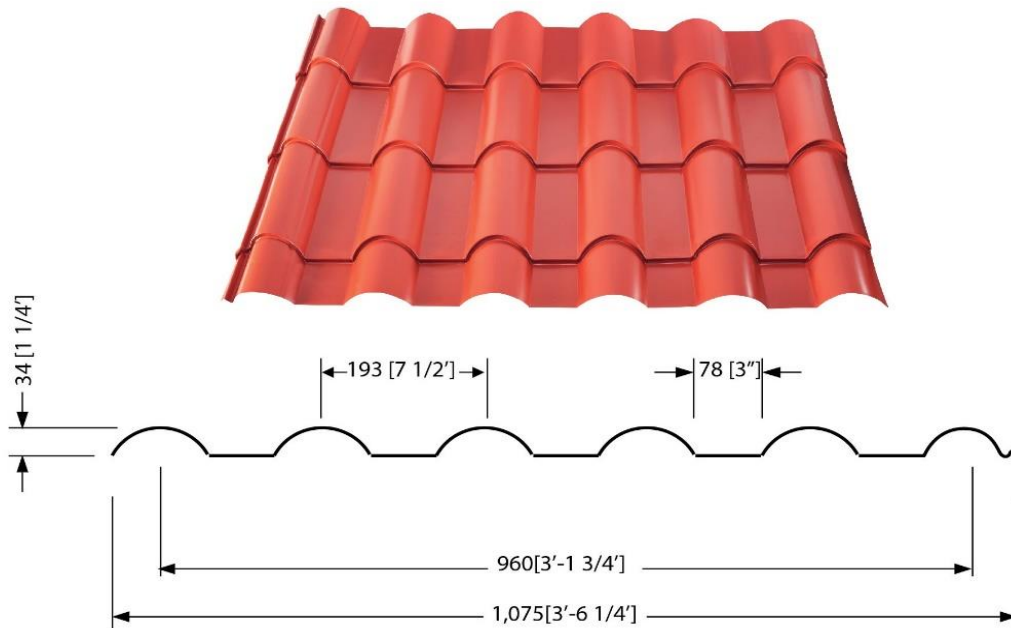

AESTHETIC ROOFING WITH WIDEST COVERAGE

With a history spanning over 150 years globally, 50 years in Asia and 20 years in Sri Lanka, BlueScope Lysaght helped shape Sri Lanka's landscape with reputation of quality, innovation and expertise to be proud of. BlueScope Lysaght Lanka proudly introduces SALIKE Roofing Tile profile to Sri Lankan market.

The wider and durable steel tile profile provides as aesthetic pleasing appearance to the roof. SALIKE Tile looks as elegant as traditional roof tiles. The profile is easy and quick to install handle and transport. It is ideal for commercial and residential applications.

The installer friendly SALIKE Tile makes it one of the most popular choices among Architects, Engineers and Contractors. Installing SALIKE Tile is proven to be faster and less time consuming than conventional clay and concrete tiles.

THICKNESS	
Base Metal Thickness(BMT) in mm	0.45
Total Coated Thickness (TCT) in mm	0.50
Effective Cover Width	960
Step Height(mm)	16
Rib Height (mm)	34
Modular Length (mm)	298
MASS	
Mass Per Unit Area kg/ m ²	4.482
Maximum Allowable Support Spacing (mm)	600
ROOF PITCH	
Minimum Recommended Pitch	7°
Grade of Steel	G 300 (300N/mm yield strength)
Coating Class (min)	AZ150

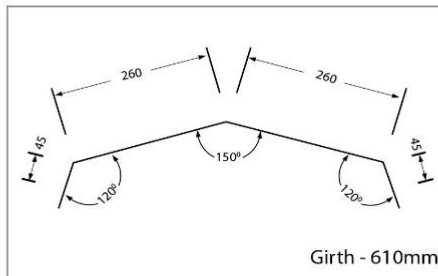

BENEFITS

- Specially designed anti capillary feature
- Leak proof roofing solution
- Enhanced aesthetics
- Superior performance against all weather conditions
- Lightweight and easy to install
- Corrosion resistant

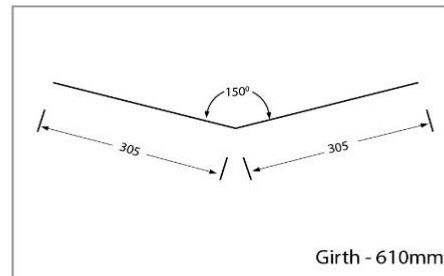

The panel structure of SALIKE Tile equates to reduced ingress points for rainwater, resulting in a strong watertight tile roof. SALIKE Tile steel panels are custom produced from a minimum length of tile modules (198 mm per module length) to a maximum length of 6m.
